BIG STRIKE IN QUINCY MINE

Splendid Ore Body Opened South of Porphyry Dike.

MEANS MUCH TO NEIGHBORS

SALT LAKER'S FINE IDAHO GOLD PROPERTY.

TOSEPH OBERNDORFER, who spent Saturday and Sunday among

the bonangas of Park City, stated' yesterday that a most important strike ad been made in the Daly-West's Quincy property, as briefly referred to in these columns on Saturday morn-For some time past the force in that portion of the company's vast territory has been driving to explore the ground south of a great porphyry dike that cuts diagonally through the Quincy and adjoining ground of the Daly-West company. On Friday last the miners broke into a body of ore that completely filled the face of the drift, and Mr. Oberndorfer, who was taken in to see it and other portions of the Quincy mine, says it looks as fine as anything exposed on the north side in the older workings. The strike was made on the 200 level,

and is equivalent to the opening of a new mine, as it has always been contended by the wise men who thought they knew all about it that the dike in question would be found to have cut the ere out from the south

The discovery of ore at this point will also be hailed with delight by the owners of ground to the south and west of the Quincy, as it makes their chances of developing big mines just that much more certain. To those familiar with the location of the dike matthese there will be given dike mentioned there will be accepted assurance that the Little Bell will come in for a slice of it, while Thompson company, the J. the new Thompson company, the J. I. C. and others will find all kinds of comfort in the news.

U. S. COMPANY ENJOINED.

Temporary Injunction Granted Ivanhoe Company.

A temporary injunction restraining the United States Mining company from removing ore claimed by the Ivanhoe Mining company and Colonel Wall was granted yesterday by Judge Marshall. This is another step in a series of litigations pending between Enos A. Wall and the United States company. The motion allowed yesterday morning was for a preliminary injunction to stop the defendants from junction to stop the defendants from trespassing on claims of the complain-ant over which a question of owner-ship has been raised.

ship has been raised.

The injunction was opposed on the ground that there was a lack of certainty in the bill describing the plaintiff's mining claim. Judge Marshall holds, however, that the defendants have produced no proof in opposition to the plaintiff's showing. In the bill it is alleged that the complainants are the owners of all the veins having their tops or apexes within the exterior boundary lines of the Ashland lede claim extending down vertically; and also of such parts of the vein extendalso of such parts of the vein extend-ing outside of the vertical boundaries which lie between the vertical planes downward through the end lines of the claim and continued in their own dion so as to intersect exterior parts

The claim in dispute is 900 feet in length. The general course of the vein is nearly parallel to the side lines of the claim and the company claims title to it by virtue of patents of the United The defendants whose claims adjoin have gone on down and, it is alleged, removed ore from the vein in dispute, which, in its dip, passes under the claims of the United States com-

It is to prevent the United States company from taking the ore from this veln on its dip that the injunction is asked for. The court holds that the defendants in describing their ground have not been sufficiently clear. Since it does not appear in the bill that the veln extends in the Ashland mining claim for a distance exceeding 900 feet from the southwestern end line, the complainant's right to the ores on their dip under the defendant's mining dip under the defendant's mining claims must be limited to that extent and a temporary injunction is granted

restraining the defendant.

The citation of Colonel Wall to appear before Judge Marshall yesterday morning and show cause why he should not be punished for alleged violation of the injunction secured by the United States company, in its suit against him for possession of the ores in the Kempton lode, went over on argument of the attorneys till Saturday next.

company met Saturday evening and ar-ranged that President Bartch should take up the bond which the company Maminoti 200 shares. take up the bond which the company holds on the Sheba claim, and within the next few days, therefore, the famous old property that caused more excitement in the early days of mining in Nevada than any other one mining claim in that state, will be owned absolutely by the Sheba company. The exact arrangement for the lifting of the bond was not made public, but it is fair to presume, in view of the fact is fair to presume, in view of the fact that President Bartch returned from camp a few days ago with a message from the owners to the effect that they would like to get part pay in stock, that the directors have would like to get part pay in stock, that the directors have acceded to that

is understood that President Bartch will leave for camp within the next few hours, and after the deal is closed for the property named orders will be given to have the fifty-ton mill on the property placed in repair, and when the new tables are added the plant will go into commission and be-gin the earnings of good money for

the company.

There has been no lack of ore with which to run the mill for several months past, but the company has been opposed to paying royalties and for that reason decided to delay the milling and shipping of the ore until the bond on the property had been taken up. The Sheba company is now getting in shape to make a noise dur-ing the coming year, and as the prop-cestion is largely controlled by Salt Lakers the chief benefits accruing will

on Idaho Gold Belt.

W. H. Byers of this city, who is president and manager of the Virginia Mining company's property, located in the famous gold belt, seventeen miles southeast of Salmon City, Ida., was exhibiting some fim-samples of gold-bearing quartz yesterday. He organized his company last year and is now congratulating himself that it contains only 100,000 shares, as the coming spring will undoubtedly see it paying dividends.

Mr. Byers has spent most of his time at the property during the sea-

time at the property during the sea-son, and next spring he intends to give

his entire time to the proposition. Up to date three shafts, 103, forty, thirty and ten feet deep, respectively, have been sunk in the vein, while a twenty-foot driff has been sent out in ore from the bottom of the deepest shaft. The ledge averages about fifteen inches thick, with three feet of ore in the bottom, showing that it widens with depth.

Mining Notes.

A. J. Bettles has gone to Colorado on

Manager A. H. Mayne of the Minola property at Park City announces that a power hoist and machine drills will be put in at the mine without delay. The property is located in Negro hollow and a shaft is now going down from the tunnel level to intercept the contact.

15 Little Chief ...

The ore assays all the way from \$40 to \$300 per ton, and the entire mass is counted upon to maintain an average of \$126 per ton. There are 1,000 tons now of \$126 per ton. There are 1,000 tons now blocked out, and counting it as averaging only \$50 per ton, there is now \$50,000 in sight. A tunnel has been started, and before spring rolls around it will have been finished to a point beneath the deepest shaft at least 100 feet deeper, thus more than doubling the amount of ore in sight.

Manager Byers has already constructed a water flume and put in a twenty-horsepower wheel, and in the spring a mill will be erected.

Manager Byers has already constructed a water flume and put in a twenty-horsepower wheel, and in the spring a mill will be erected.

AT THE HIAWATHA.

Tunnel Has Been Driven 125 Feet in Old. Domin. 15 5el

Three Weeks.

W. J. Lawrence and Fred Dern spent Sunday at the property of the Hlawatha Gold Mining company, at the mouth of Little Cottonwood canyon, Mr. Dern stated yesterday that during the past three weeks the tunnel which is being driven to cut the ve.n at a vertical depth of over 300 feet had been extended 125 feet

feet.

According to survey there is yet a little more than 400 feet to run to the objective point. Superintendent Semmek has three shifts at work all the time, and at the present rate of speed it will not take long to tap the ore bodies, which, on the surface, were productive of such nice high grade gold rock.

Ore and Bullion.

Ore and bullion settlements in this city yesterday amounted to \$79,500, as reported by McCornick & Co., divided as follows: Silver, lead, gold and copper ores, \$31,900; base bullion, \$11,200; gold bars, \$27,400.

Silver, 50%c per ounce. Copper, 10%c per pound; New York, \$11.35 to \$11.45 per 100 pounds. Lead, \$3.50 per 100 pounds; New York \$4.12%.

MINING STOCK WARKET

Week Opens to Good Business and Little Change in Prices.

Little Change in Prices.

The week opened on 'change yesterday with the sale of \$2,922 shares of stock, which had a selling value of \$49,104.62. With few exceptions prices held well up to Saturday's quotations, though there was nothing to indicate that the week would find any particular change from the unsteady character of the market as reflected in the past week's dealings.

Carlsa and Ajax held up to Saturday's figures. Consolidated Mercur continued draggy, while Daly was stronger, around \$2.20.

Grand Central did a lively business in

Grand Central did a lively busine he afternoon at \$5.20 back to \$5.08, .ower Mammoth was traded in an

May Day fell back from 33c to 30c, Sac-

California was about the same as on Saturday, Century was stronger at \$1.12. Tetro jumped to 24c on the afternoon open board and Uncle Sam moved up to 35c.

Wabash was hammered down from \$2.19 to \$1.96, Daly-Judge did business at \$2.80 to \$10. New York sold at 62c to 64c and Comstock held firm at \$1.22, the remainder of the list holding its own fairly well. The day closed on the fellowing record of final quotations and sales:

PRICES BROKE IN THE MORNING

Almost a Complete Recovery During the Afternoon.

WALL STREET IN A NUTSHELL

EVERYTHING AWAITS SETTLE-MENT OF COAL STRIKE.

New York. Oct. 12.—The violent and almost uncontested break in prices of stocks this morning and a practically complete recovery this afternoon is the history of today's market. The closing prices showed a sprinkling of net gains among some of the most important stocks in the list, reaching a point in Reading and Ontario & Western. At one time before noon there were ragged declines indicated of all the way from 1 to 12 points from Saturday's level, many of the leading speculative stocks having lost 3 to 4 points in the two hours of trading. The sentiment in the street seemed mixed before the opening between the contending influences of the reports that a settlement of the coal strike had been arranged and the admonition contained in the Saturday bank statement that there must be further contractions of loans placed in the stock market. The latter influence swept away all other considerations, and with the exception of a momentary raily after the opening, due to the taking of bear profits by Saturday's shorts, the market pursued a steady downward course, under a continuous stream of liquidation.

It was evident that further selling out on the part of some large speculative pools was going on, presumably under pressure of the demand from money lenders for repayment of loans. The Gould southwesterns and some of the stocks in which the so-called western contingent have operated largely were notably affected. The recent tendency of high priced investment stocks which had been pushed to an extraordinary level to break violently on small sales continued in evidence in the cases of American Express, United States Express, Lackawanna, Delaware & Hudson, Great Northern preferred. General Electric and similar stocks: When the liquidation first showed signs of decreasing, the bears caused a sharp raily by covering of shorts, after which the market possibility of improving the output of the financial and operatung powers of the financial and operatung powers of the financial and operatung powers of the mines under protectio mining business.

The Hecker company will have a carload of ore on the market today.

The New England company of Bingham had a carload of nice ore on yesterday's market. Manager Boyd of the White Knob Cop-The Mammoth company reached the market yesterday with a "small jag" of ore, consisting of ten carloads.

The Taylor & Brunton sampler was yesterday in receipt of fourteen cars of ore from Tintic, one from Bingham and three from Tonopah. The Tonopah company marketed three cars of high grade ore yesterday, while another consignment just as large has reached the sidetracks at the sampler.

less to offset the depressing influence of the bank statement. Money went to 18 per cent soon after the opening. Sterling exchange broke sharply, but discounts in London resonded with an advance. The coming week's syndicate requirements, which foot up soom \$50,000,000, we're considered formidable in view of the money situation. The market closed with a rally in full force and prices at the top level.

Bonds weakened and recovered in sympathy with stocks. Total sales, \$4,845,000, U. S. new and old \$6 declined \$6 per cent on the last call.

Bond Quotations.

a shalt is now going down from the tunnel level to intercept the contact.

Ernest Bamberger, manager of the Keystone company's mines at Fark City, is back from camp. He reports the campaign on the property progressing nicely, while some large blocks of treasury stock have been absorbed by wealthy eastern operators, including Simon Guggenheim.

The latest reports from the Comstock are to the effect that not a little shipping ore is now making along with the fine milling rock that has opened up so splendidly on the 300 level of that mine. At the point where the cross-cut has been run there has been noened twenty-eight feet of ore and the drift has been run there has been opened over sixty feet further through lode porphyry without the wall having been reached. Another body of ore is expected to be developed on that side of the porphyry.

Secretary C. B. Stewart and Professor lode porphyry without the wall having been reached. Another body of ore is expected to be developed on that side of the porphyry.

Secretary C. B. Stewart and Professor Kingsbury left in company with Manager J. S. Free last evening to make an inspection of the recently organized Park City Gold & Silver Minling commany's property, in the Snake Creek mining district. They went by way of Heber City.

G. A. Land, the well known mining operator, returned from a two months' trip to New York Sunday evening. He says there are all kinds of interest being shown in western mining investments, particularly in Tonopah, where a number of strong companies, backed by eastern money, are now making the furfly.

Spelter here closed quiet at £16 15s.
Spelter here closed quiet at £1½ but lost 2s &d in London, where the closing quotation was £19 5s.
Iron was quiet abroad, Glasgow closing at 57s 11d and Middlesboro at 53s 4½d. Locally, iron was dull and nominal. Warrants, nominal; No. 1 foundry, northern; No. 1 foundry, southern, and No. 1 foundry, southern, and No. 1 foundry, southern soft, 22.00223.00.

GRAIN AND PROVISIONS.

GRAIN AND PROVISIONS.

Chicago, Oct. 12.—Wet weather and higher cables caused a strong opening in wheat today, but large receipts in the northwest, with predictions of better weather, caused considerable selling early by commission houses. Local sentiment, however, was bullish and offerings were well taken. In the latter part of the day prices advanced again on a good demand, with limited offerings.

Poor grading, fair cash demand and some increase in the visible supply were the sustaining features. December opened %2%c higher at 71% to 71%, but slid down to 70% early on heavy liquidation. Later on offerings became limited, and with good buying by commission houses there was an advance to 71%. Another reaction followed, but the close was %2%c higher at 76%c71.

Corn opened strong on wet weather and higher cables. The feature was the unloading of a long line by a prominent trader, it being reported that over 1,600,000 bushels were disposed of. The close was %2 lower at 47%c67%.

Oats were strong with corn, but on commission house selling prices tended lower. December closed %2%c at 31%.'

Provisions were traded in moderately and held fairly firm. January pork closed 2%c lower, lard and ribs unchanged.

The leading futures ranged as follows:

Wheat-No. 2:

Mess Pork-Per barrel | Open. | High. | Low. | Close. Jan. ..|15.75 May ..|14.921/2

"I am nervous and run down now, but I will be all right in a week."

It Cures Nervous Men. Cures Female Weakness. Cures Back Pains. Cures Stomach Troubles.

DR. McLAUGHLIN'S ELECTRIC BELT IS A popular remedy nowadays. It is the only remedy which will cure while you sleep. Just put it on when you go to bed, feel the warm, glowing vitality going into your weakened parts and restoring their life and vigor, and not a moment's inconvenience.

And you don't have to dose your poor stomach with nasty drugs. This shows what it does.

RHEUMATISM.

Dr. McLaughlin—Dear Sir: Pardon my silence for so long. I will now write you regarding my progress with the Belt. I was hardly able to cripple around when I received the Belt. I had been taking medicine for some time, which generally checked my Rheumatism only to come on again with a change of weather. I put the Belt on as soon as I received it, and in five days was able to walk all right. I am now glad to say that though I have been a sufferer for nineteen years through every change of climate. I have felt well this winter and worked steadily in all kinds of weather without suffering from Rheumatism. I was always a skeptle on Electricity benefiting the human system, but I find that we are never too old to learn. Expressing my heartfelt thanks to you. I must close. Hoping that others may gain like relief by using your treatment, and with best wishes. I remain. Yours truly.

P. S.—If my testimony is of any moment, use it for the good of mankind.

FREE BOOK I will be glad to send you my BOOK, with full information, sealed, free, if you will send this ad. Dr. M. B. McLAUGHLIN, 931 16th Street, Denver, Colo.
